

Overview

SITRANS LVL200 is a standard vibrating level switch for material detection in liquid and slurry applications such as overflow, high, low, and demand applications, as well as pump protection. For use in SIL-2 applications.

Benefits

- Proven vibrating level switch technology for liquids
- Compact insertion length of 40 mm (1.57 inch) for confined space applications
- Fault monitoring for corrosion, loss of vibration or line break to the piezo drive
- Functional Safety (SIL 2). Device suitable for use in accordance with IEC 61508 and IEC 61511
- Hygienic process connections
- Suitable for API 2350
- Optional remote test signal conditioner

Application

SITRANS LVL200 is a level switch designed for industrial use in all areas of process technology and can be used with liquids and slurries. With a tuning fork insertion length of only 40 mm (1.57 inch), SITRANS LVL200 can be mounted in small pipes and applications with confined space. The LVL200 can be used to measure products with a minimum density of $> 0.5 \text{ g/cm}^3$ (0.018 lb/in^3). The LVL200 can be used in difficult conditions including turbulence, air bubbles, foam generation, buildup, or external vibration.

SITRANS LVL200 continuously monitors faults via frequency evaluation, providing early detection of strong corrosion or damage on the tuning fork, loss of vibration, or a line break to the piezo drive.

The tuning fork is piezoelectrically energized and vibrates at its mechanical resonance frequency of approximately 1 200 Hz. The vibration frequency changes when the tuning fork is covered by the medium. This change is detected by the integrated oscillator and converted into a switching command. The integrated electronics evaluate the level signal and output a switching signal, directly operating connected devices.

The optional signal conditioner provides a remote test feature to ensure continuous product reliability.

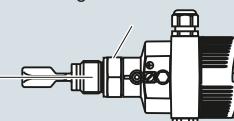

- Key Applications: for use in liquids and slurries, for level measurement, overfill, and dry run protection

Configuration

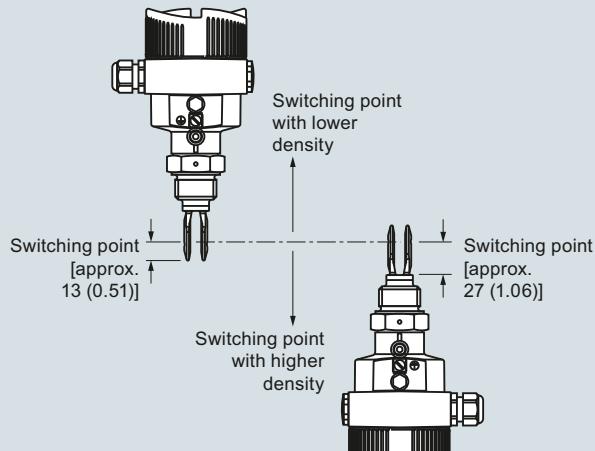

Horizontal mounting

Switching point (recommended mounting position, particularly for adhesive applications)

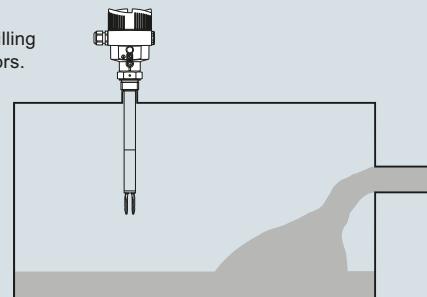

Marked with screwed version on top, with flange versions directed to the flange holes

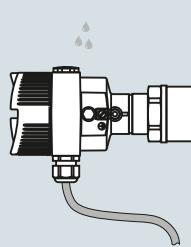

Vertical mounting

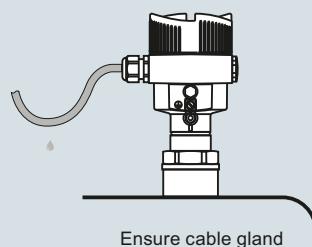

Mount away from filling openings or agitators.

Moisture protection

NOTE:
Welded socket for flush mount optional

Ensure cable gland faces downward to avoid water ingress.

SITRANS LVL200 installation, dimensions in mm (inch)

Level Measurement

Point level measurement
Vibrating switches

SITRANS LVL200

Selection and Ordering data

SITRANS LVL200, Rigid extension

Compact vibrating level switch for material detection in liquid applications such as overflow, high, low, and demand applications, as well as pump protection. For use in SIL-2 and hazardous applications.

SITRANS LVL200, Rigid extension

Compact vibrating level switch for material detection in liquid applications such as overflow, high, low, and demand applications, as well as pump protection. For use in SIL-2 and hazardous applications.

NOTE:

When selecting a Process connection option, process connection coating must match the extension coating and the material and surface roughness type.

German				

¹⁾ Available only with terminal block connection option B

²⁾ Available only with terminal block connection option A

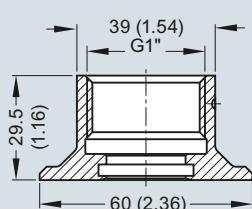

Options

LVL200 threaded welded socket

G 3/4" A/316L

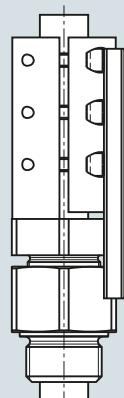

G 1" A/316L

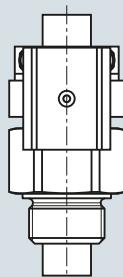

Lock fitting

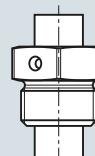

LVL200 extended
64 bar

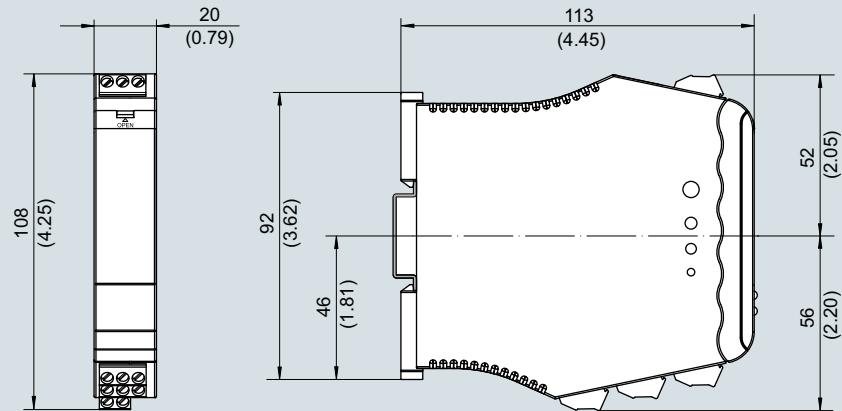

LVL200 extended
16 bar

LVL200 extended
unpressurized

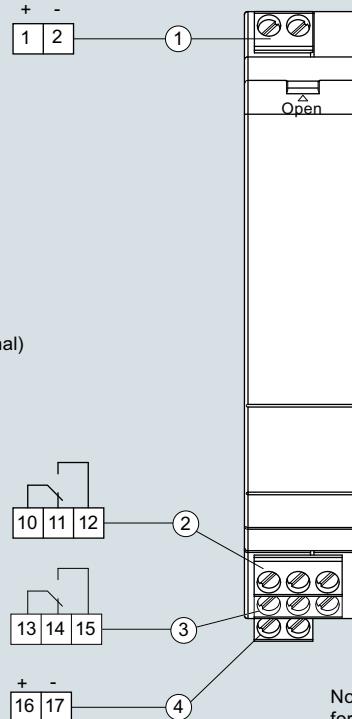

SITRANS LVL200 welded socket and lock fitting, dimensions in mm (inch)

SITRANS SCSC and TCSC LVL test conditioner

SITRANS SCSC and SITRANS TCSC LVL Test Conditioners, dimensions in mm (inch)

- ① Sensor circuit 8/16 mA
- ② Relay output
- ③ Fail safe relay/second relay output (optional)
- ④ Voltage supply

SITRANS SCSC and SITRANS TCSC LVL Test Conditioner connections

Level Measurement

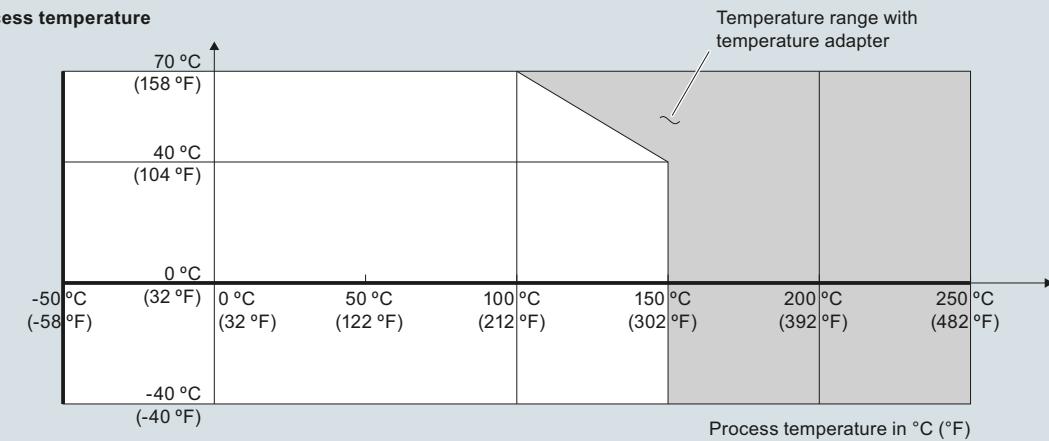

Point level measurement

Vibrating switches

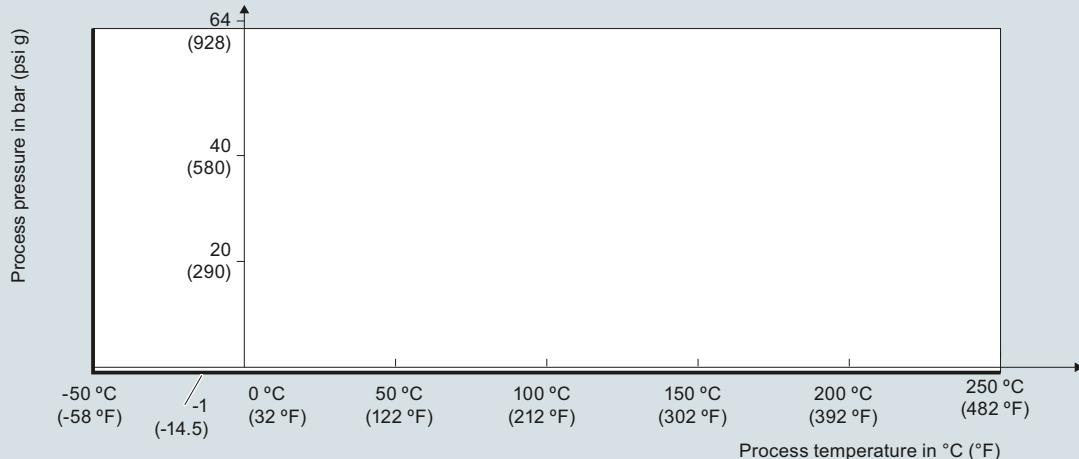

SITRANS LVL200

Characteristic curves

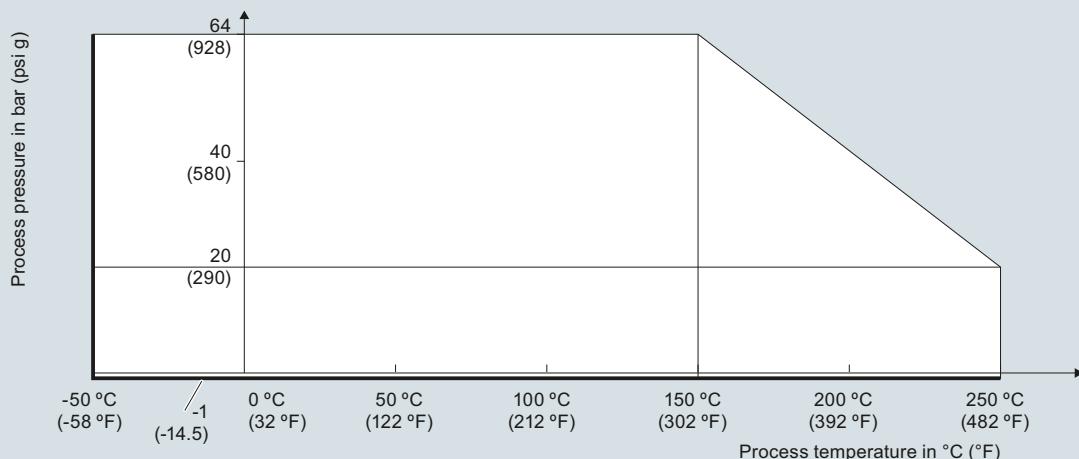

Ambient/Process temperature

Process pressure with switch position 0.7 g/cm³ (mode switch)

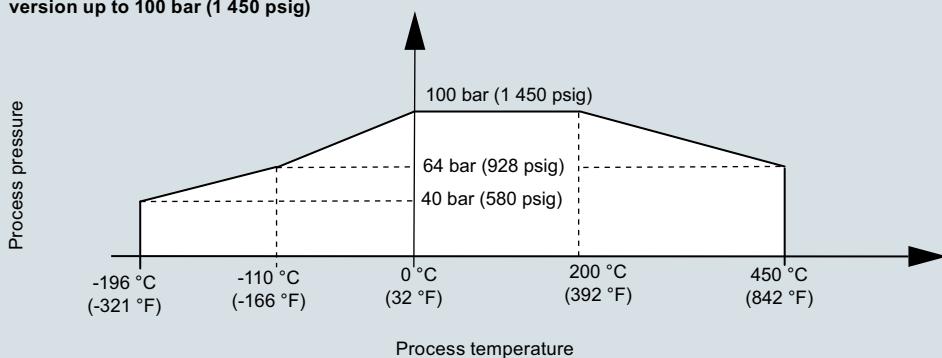

Process pressure with switch position 0.5 g/cm³ (mode switch)

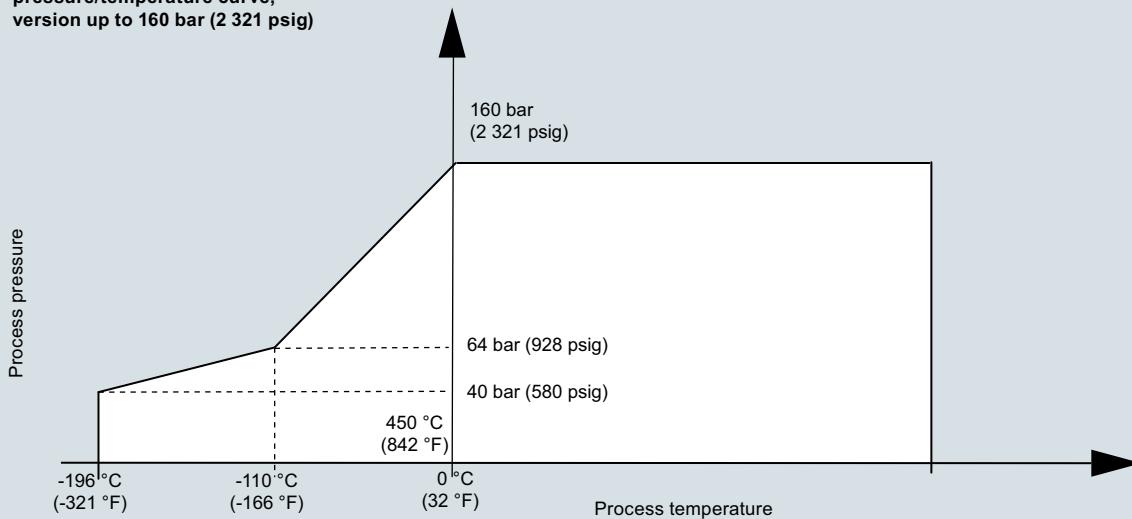

SITRANS LVL200 process pressure/process temperature/ambient temperature derating curves

SITRANS LVL high temperature process temperature/process pressure, version up to 100 bar (1 450 psig)

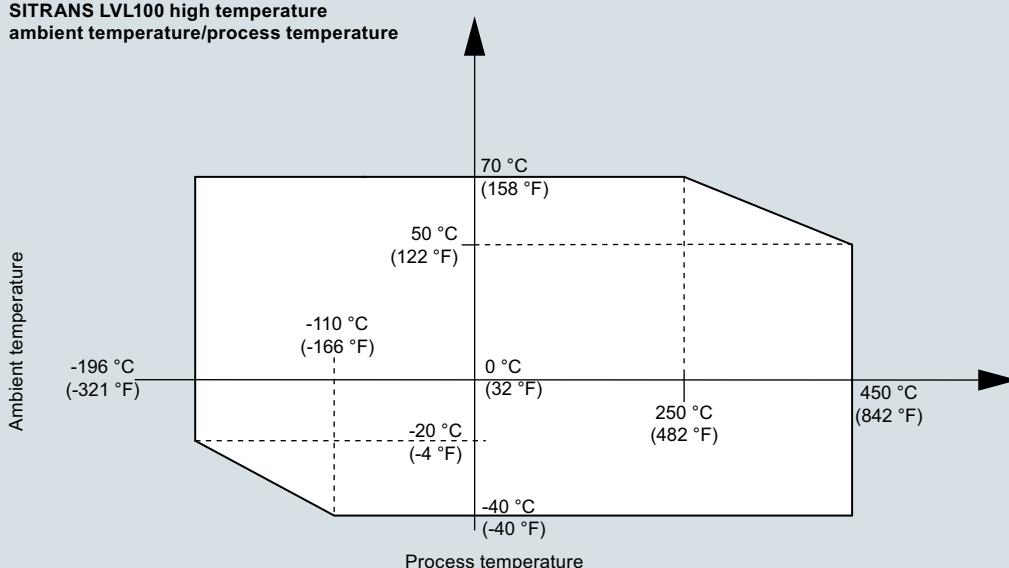

SITRANS LVL200 high temperature, process temperature/process pressure version up to 100 bar (1 450 psig)

SITRANS LVL200 high temperature pressure/temperature curve, version up to 160 bar (2 321 psig)

SITRANS LVL200 high temperature, pressure/temperature, version up to 160 bar (2 321 psig)

SITRANS LVL100 high temperature ambient temperature/process temperature

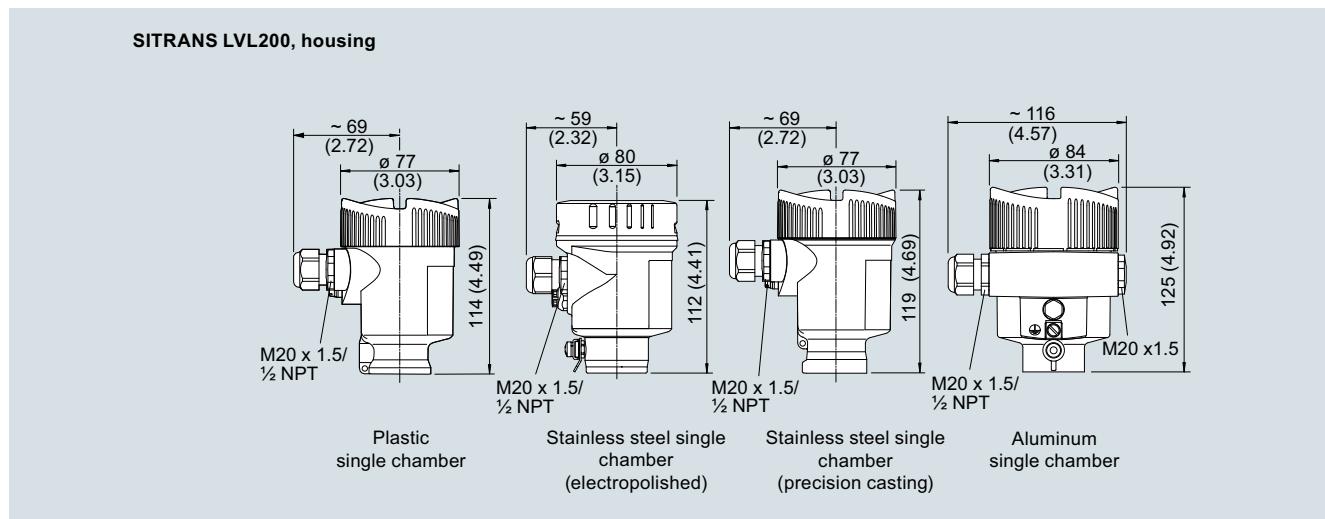

SITRANS LVL200 high temperature ambient temperature/process temperature, version up to 100 bar (1 450 psig)

Level Measurement

Point level measurement
Vibrating switches

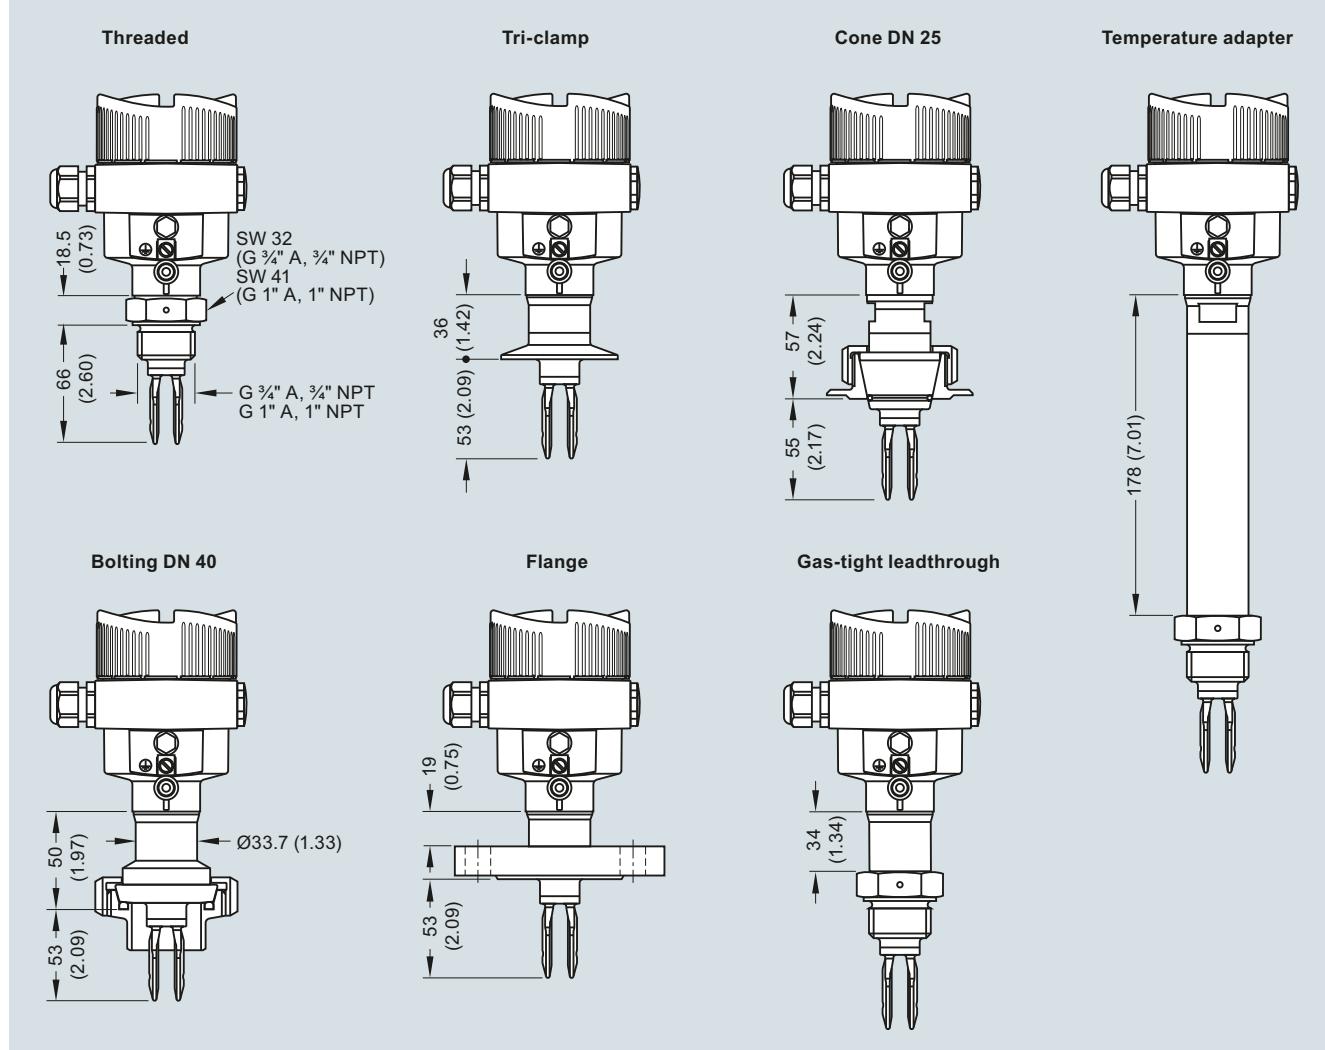

SITRANS LVL200

Dimensional drawings

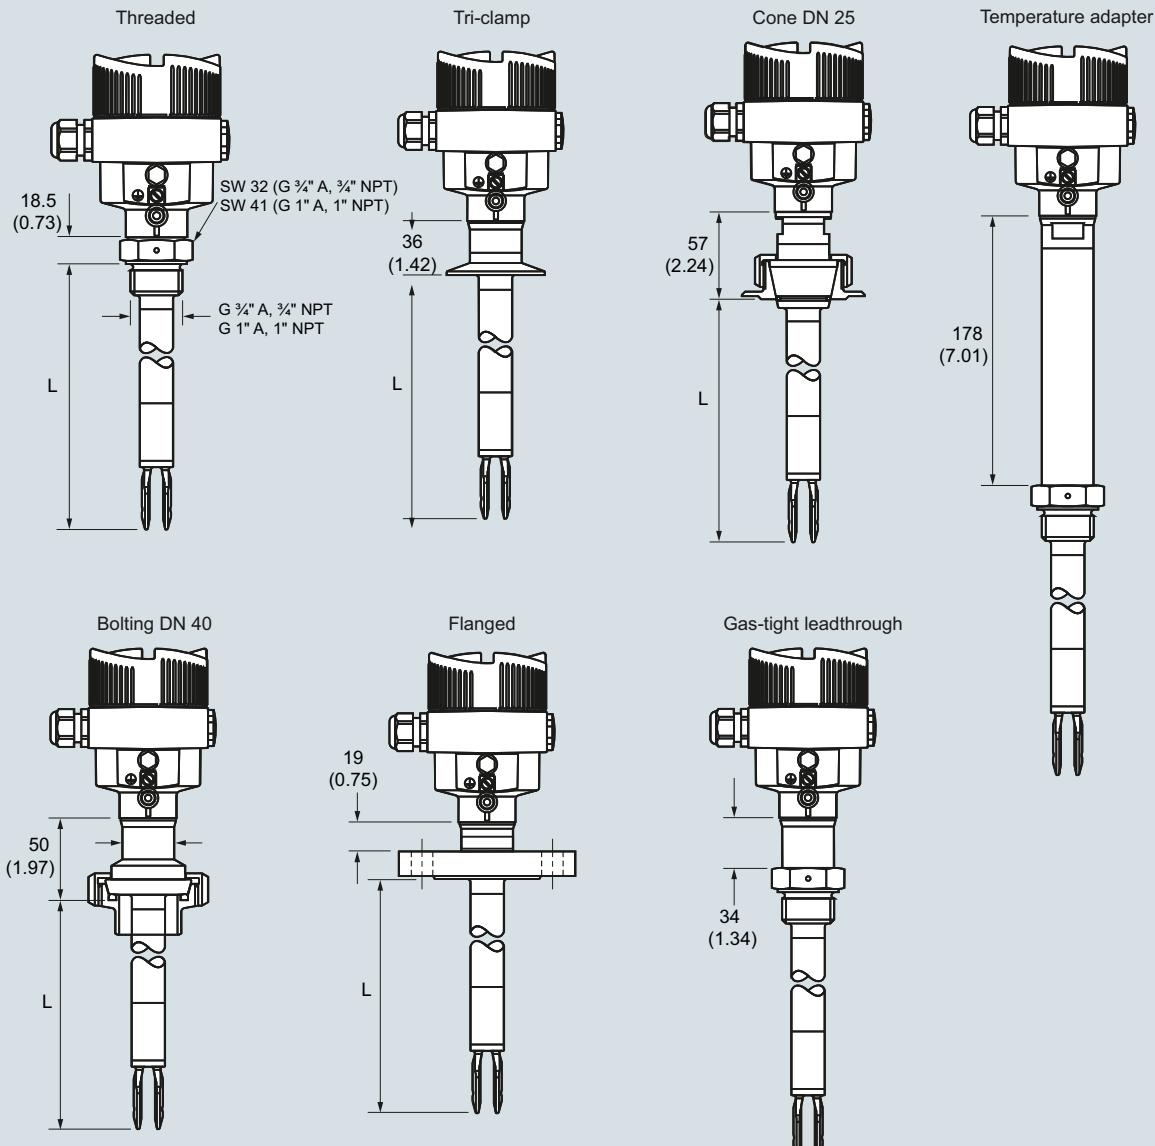

SITRANS LVL200 housing, dimensions in mm (inch)

SITRANS LVL200 standard

SITRANS LVL200 (standard), dimensions in mm (inch)

SITRANS LVL200 extended**Sensor length (L)**

316L, Alloy C22 (2.4602)	80 ... 6 000 mm (3.15 ... 236.2 inch)
Enamelled	80 ... 1 500 mm (3.15 ... 59.06 inch)
316L, ECTFE coated	80 ... 3 000 mm (3.15 ... 118.1 inch)
316L, PFA coated	80 ... 4 000 mm (3.15 ... 157.5 inch)

SITRANS LVL200 (extended), dimensions in mm (inch)

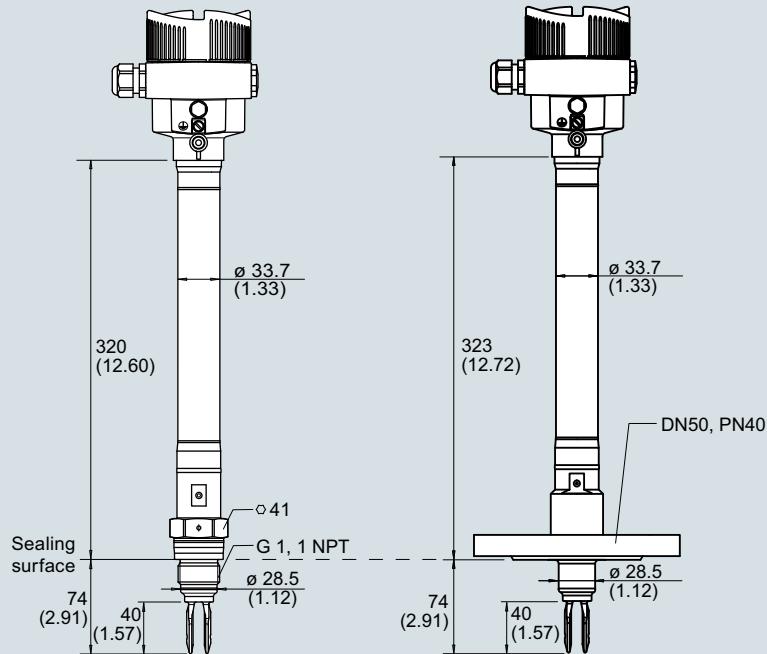

Level Measurement

Point level measurement

Vibrating switches

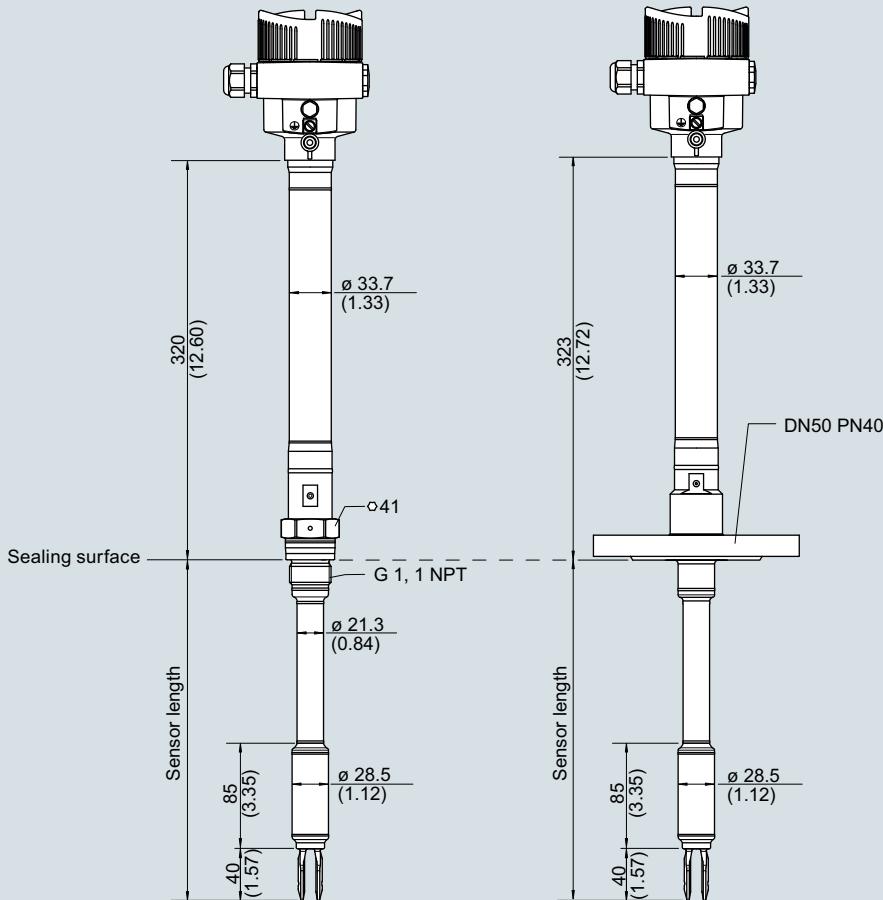

SITRANS LVL200

SITRANS LVL200 high temperature, compact version

SITRANS LVL200 high temperature (compact version), dimensions in mm (inch)

SITRANS LVL200 high temperature, tube version

SITRANS LVL200 high temperature (tube version), dimensions in mm (inch)

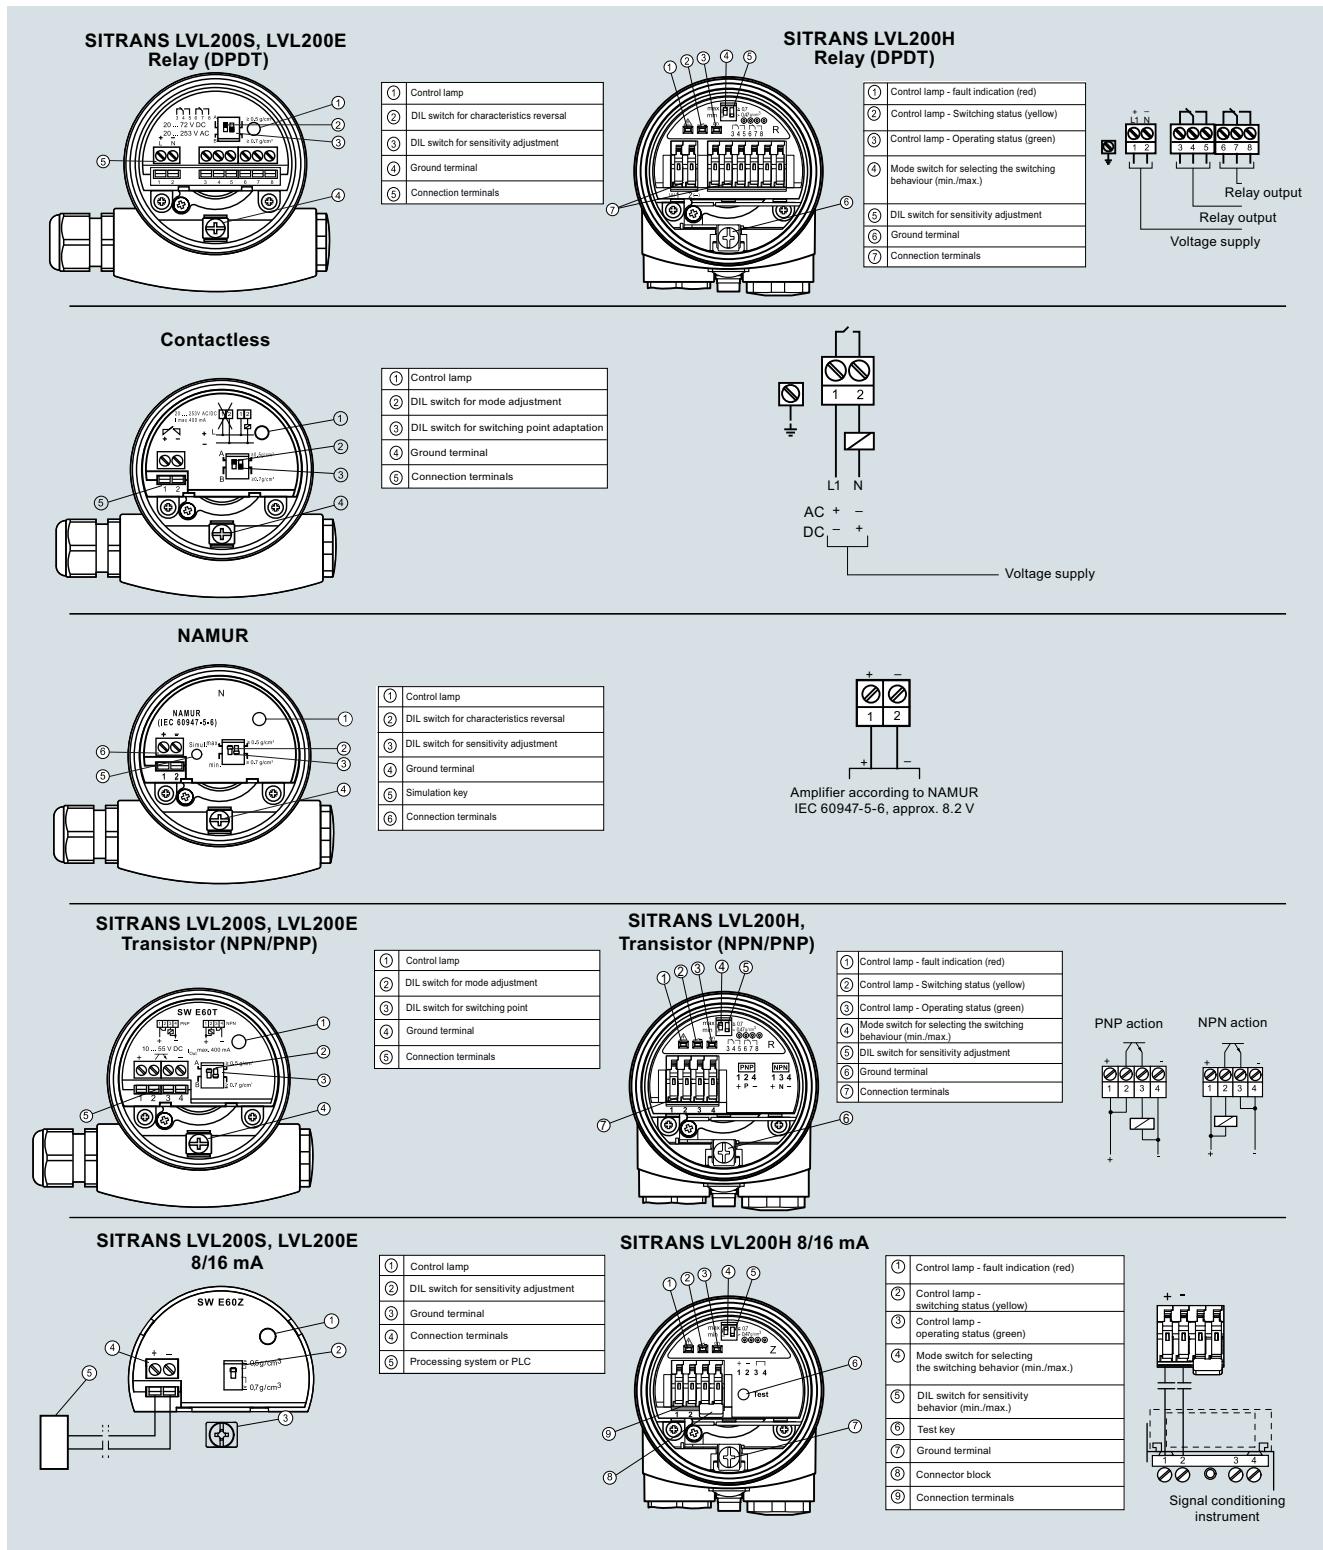

Level Measurement

Point level measurement

Vibrating switches
